Introduction

By March 2006, 34 of 53 occupational groups tracked by the Alberta government showed an unemployment rate of three per cent or less, indicating skill and labour shortages. This document presents a series of economic indicators to identify labour and skill shortages or surpluses in industry sectors.

Indicators such as the unemployment rate, vacancy rate, hiring difficulty rate and demand-supply ratio[1] are used to determine the presence of shortages or surpluses now and in the future. This tool should not be used to make decisions. Instead, the intent of this dashboard is to spark discussion and give a snapshot of where the occupational cluster is likely to be within the next 10-year period. Additional provincial labour market information, including regional information, can be obtained at www.hrepmalberta.com to assist with decision making.

What is a shortage?

Shortages were determined by looking at the unemployment, vacancy, and hiring difficulty rates, as well as the demand-supply ratio for a number of occupational clusters within sectors. Occupations are sorted by industry sector as outlined in Appendix A.

This booklet uses a traffic light system to help define shortages, based on the following:

Unemployment: If the unemployment rate of an occupation is less than three per cent, there is a shortage.

Vacant jobs: If the vacancy rate of an occupation is more than two per cent, there is a shortage.

Hiring difficulty: If the hiring difficulty rate of an occupation is more than 25 per cent, there is a shortage.

Demand and supply of workers: A demand-supply ratio of greater than one indicates a supply shortage while a ratio of less than one indicates a supply surplus.

Occupational clusters are coded red, yellow or green based on the following:[2]

Red – All indicators show shortage OR the vacancy rate is over five per cent and the reported hiring difficulty over 40 per cent.

Yellow – One or more indicators show shortage.

Green – All indictors show a surplus.

[1] See Appendix B for more information about the unemployment rate, vacancy rate, hiring difficulty rate and/or demand-supply ratio.

[2] See Appendix C for more detailed information on the colour coding for each occupation.

Manufacturing

The manufacturing sector includes manufacturing of food, beverages, tobacco products, textiles clothing, petroleum, coal, chemical plastics, rubber manufacturing and more.[1]

Industry Challenges and Issues

Alberta's manufacturing sector is expected to grow faster than the national average, according to a recent BMO Financial Group report. New opportunities will be high for the industrial machinery and equipment sector, leading to a labour crunch with an increasing shortage of skilled workers, such as pipe fitters and machine operators. Tight labour supply and leading edge production processes are key drivers for a push towards "lean" manufacturing (less time, less inventory, increased use of technology and fewer workers requiring less space). Lean manufacturing requires increased skill levels of workers, implying the need for more and more specialized training.

Occupational Cluster	2003[2]	2005	2015
Administrative and Regulatory Occupations	Concern	Concern	Shortage
Administrative Services Managers	Concern	Concern	Surplus
Administrative Support Clerks	Surplus	Concern	Surplus
